---

## WORK EXPERIENCE

**Wipro Technologies -** *Senior Software Engineer*                       **Aug 2018 - Present**

- 6+ years of experience in building **cross browser compatible**, **responsive** and **compliant** web applications.
- Experience with **React** and its core principles - with popular **React workflows** and component libraries (like **Material UI**, **React router**, **React Intl**)
- Worked on **Optimized frontend application** performance by minimizing initial app loading time, **reduced bundle file sizes** and server requests.
- Worked on building frontend clients for **Generative AI** based applications, providing data driven insights on candidate, fitment, skill assessment and interview question generation.
- Involved in revamping the entire PHP based legacy projects into **React reimagined**.
- **Collaborated with designers** to ensure UI/UX requirements are met.
- Gathered exposure in **Unit testing** including tools like **Jest** and **React testing library**.
- Worked in an **Agile** development environment to define stories, do estimations and plan sprints.

---

## PERSONAL PROJECTS

**File Sharing Web App** - *JavaScript, Node, Socket.io*
Share files in real-time with anyone without storing them on the server.

**Chatroom Web App** - *JavaScript, Node, Socket.io*
A real-time chatroom for instant messaging and user interaction.

---

## EDUCATION

**Jamshedpur Women's College** - *Jamshedpur*                       **June 2015 - June 2018**
Bachelor of Science in Information Technology
